

What will you do when SharePoint 2010 support ends?

Getting it right could help transform your workplace experience

If you're running SharePoint 2010, the most popular edition of Microsoft's flagship collaboration software, time is running out. Extended support ends October 2020. Most companies will need more than 12 months to migrate to a newer, supported version of SharePoint. So, you need to prepare now for the end of support. Avanade—Microsoft's Partner of the Year for 11 straight years—can help.

Not thinking about SharePoint? You need to think again.

SharePoint 2010 powers intranets, knowledge sharing and collaboration at companies everywhere. If it's a crucial part of the workplace experience at your company, what will do you when extended support ends? No more updates or security patches means a higher risk of disruption and security breaches. It's not a risk you want to take.

The time to plan for what follows SharePoint 2010 is now. Migrating will likely take longer than you think.

You'll need to:

- Inventory the content to migrate
- Assess the features you need
- Catalog your customizations
- Migrate perhaps terabytes of content and thousands of applications
- Plan for records management and eDiscovery
- Minimize user disruption

You have choices

Migrating from SharePoint 2010 means challenges. But it also means choices. Consider moving to the cloud, with Microsoft Office 365 and SharePoint Online.

You'll find tools that are easier to use, new capabilities and a lower cost of ownership. You can supercharge your employees' productivity with powerful collaborative tools, including Teams, Planner and PowerApps.

Transforming your SharePoint environment with a move to the cloud means you'll never again face the challenge of a SharePoint expiration. Even better, you'll find that moving to SharePoint Online can help you accelerate your overall cloud migration, reduce infrastructure maintenance costs and free IT personnel for higher-value tasks.

When your data is sensitive, inactive or can't be moved to the cloud for governance or regulatory reasons, SharePoint still has you covered, with on-premises and hybrid versions, including SharePoint 2013, 2016 and 2019.

Here's your opportunity

How much you gain from your SharePoint migration depends on how you see it. If you see SharePoint 2010 end-of-life as a nuisance to be endured, you'll do the minimum to get by—and let your opportunities slip by, as well.

But if you seize those opportunities, migrating and upgrading SharePoint can be your chance to update your entire intranet for a more personalized, engaging and mobile-enabled experience.

Turn your intranet into a digital hub that helps your employees to connect and collaborate. Rationalize content and applications to boost effectiveness and cut costs. Accelerate the transformation of your workplace experience.

You can do it all.

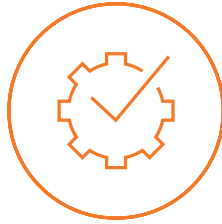

Make your SharePoint upgrade a success with Avanade

When you go to the effort of migrating from SharePoint 2010, why go it alone? Work with the world's most experienced technology provider of Microsoft solutions: Avanade.

We understand how to minimize the time, risk and cost of a SharePoint migration while delivering maximum benefit and ROI.
