

Avanade® Business Intelligence Services

Avanade Performance Analytics for Banking™

Drive success

Make faster and better decisions

Stay ahead of the competition as you plan, forecast, monitor and analyze your bank's business performance with increased effectiveness. Drive success with actionable information, easy-to-use tools and consistent processes.

Align your operational procedures with your strategy

- Define a strategy, model the key drivers for success and share valuable insights to efficiently execute plans.
- Adopt a comprehensive, unified approach that integrates risk analysis, customer analysis, pricing optimization and industrialized loan management processes across your financial institution.
- Boost consistency and efficiency with Avanade Planning Framework™, a cost-effective and scalable platform that supports aligning compensation models with performance metrics.
- Accelerate implementation with a banking-focused solution that drives change companywide through dynamic evaluation of initiatives, planning and resource allocation.

Gain insights and increase effectiveness

Get a comprehensive, integrated view of your bank's critical value drivers—now and in the future. Avanade Performance Analytics applies a unique approach that addresses the complete range of management, compliance and regulatory requirements. As a result, your people get competitive insight and actionable information when they need it, in the format they need it, to achieve the best results.

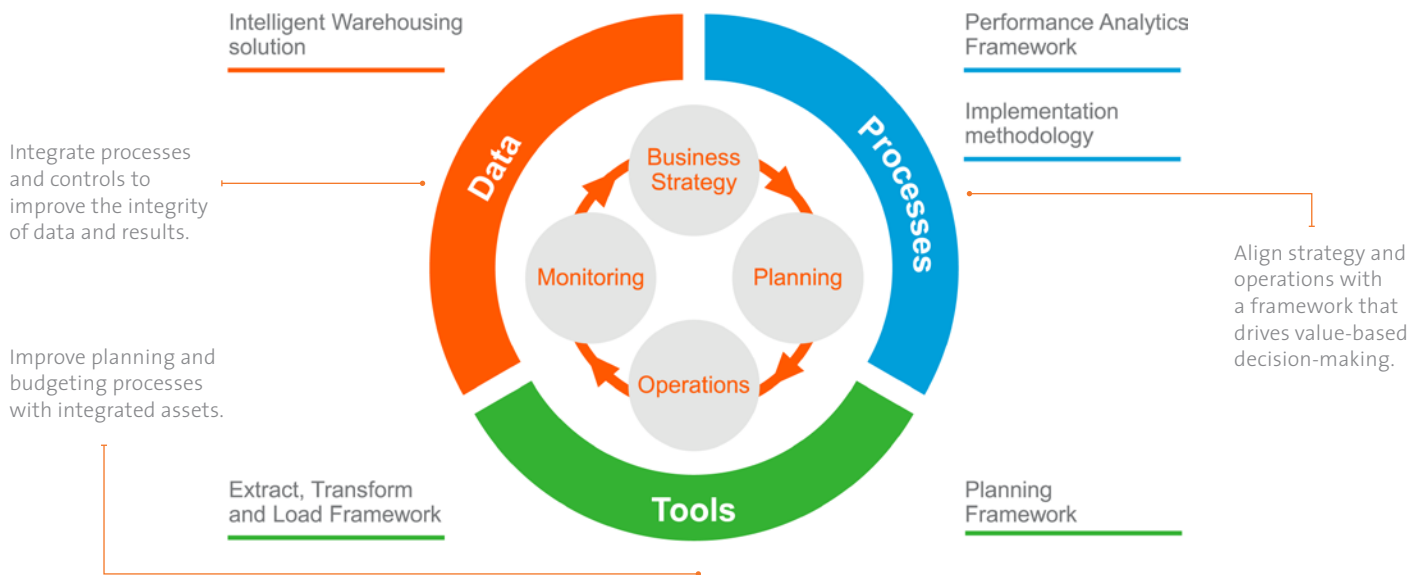

Partner with a leader to drive innovation

Avanade is a leading global provider of enterprise performance management solutions based on the Microsoft® platform. As your strategic consulting partner, we offer a complete end-to-end solution featuring proven assets and methodologies, implemented by a global network of delivery and industry experts on demand. And our close connections to Accenture and Microsoft enhance our services, so we can give you a clear competitive edge.

Profit from our banking expertise

Capitalize on Avanade's industry-specific template and success working with global financial institutions. For example, a leading Swiss bank struggled with an IT source system that delivered aggregated data with limited proactive control and restricted reporting. We helped the customer create a modern data warehouse solution that ensures no disruption in day-to-day operations and significantly reduces IT costs.

Performance Analytics is an end-to-end solution

Avanade combines industry expertise with a comprehensive solution, built on the Microsoft enterprise platform, to help reduce time and productivity costs.

About Avanade

Avanade provides business technology services that connect insight, innovation and expertise in Microsoft® technologies to help customers realize results. Avanade's services and solutions help improve performance, productivity and sales for organizations in all industries. Additional information can be found at www.avanade.com.
