

# Avanade® Enterprise Resource Planning Solution

Cloud ERP

# Optimized performance

## Manage your business in the cloud

The Avanade Cloud ERP solution offers flexible enterprise resource planning (ERP) that supports the growth of your business within a fully managed private cloud environment - built on the proven Microsoft Dynamics® AX platform.

## A cloud based solution that just works

- Expand easily into new markets and rapidly scale your global ERP system with minimal IT effort.
- Provide real-time visibility across your operations for financial reporting and faster operational decision-making.
- Reduce complexity and simplify compliance with multi-site, multi-language, multi-company, and multi-currency capabilities.
- Improve your business processes, including intercompany trade, multi-site planning, shared services, and book closing.
- Optimize local operations while meeting enterprise requirements to consolidate financial and operational data.
- Implement a two-tier approach by synchronizing financial data between the divisional and parent organizations.

From Accenture and Microsoft

### Industry Leading Cloud Infrastructure

Our innovative and scalable architecture provides a dedicated and fully managed hosting environment, yet fully customizable. It is based on your specific needs and allows you complete control over your ERP system. Its features include:

- Physical hosting and backups
- Disaster recovery
- Microsoft server licenses
- Dynamics AX licenses
- System maintenance and patching
- Pre-production & production environments
- Dynamics AX administration, monitoring and performance tuning
- Dynamics AX application management
- Dynamics AX user support
- End to end SLA's
- Level 1 support 24/7/365

### Simplify your Dynamics AX Deployment

You can also take advantage of Avanade Fast Track Implementation (FIT). It helps you lower costs with a fast and structured implementation based on standardized functionality. This methodology enables you to support your key business processes by using our well established and proprietary sets of data, parameters, and embedded best practices. Our step-by-step user documents and templates also give you the ability to enter your data directly into Microsoft Dynamics AX.

### An ERP platform you can rely on

The Avanade Cloud ERP solution is based on the proven Microsoft Dynamics AX platform. It includes a broad range of functions, including financials, operations, reporting and analysis, human resources, and IT development.

Our solution expands upon these functions with a rich feature set, targeting a growing list of industry sectors available across the globe:

- Wholesale Distribution
- Retail Management
- Professional Services
- Manufacturing

### Fully managed so you can focus on your business

With Avanade Cloud ERP, we can each focus on what we do best respectively. While you manage your business, we build, maintain, and support the IT system.

Our solution is designed for:

- Small and medium businesses that anticipate substantial growth
- Businesses that have invested in a centralized ERP system and need a two-tier solution that is simpler, efficient, and cost-effective in their branch offices
- Businesses that plan to add functionality by performing substantial development to their ERP solution

### Customizable to meet your business needs – without constraints

If you require the benefits of Software-as-a-Service (SaaS) with the option to customize the application/solution, we offer a compelling advantage. The Avanade Cloud ERP solution delivers a fully customizable application/solution to meet your specific requirements - today and in the future.

### Grows to support your changing volume and complexity requirements

Your business rarely remains static. The Avanade Cloud ERP solution is designed to grow with you. As your business expands - organically or through acquisitions - our solution scales for complexity and volume. This helps you avoid having to start a new ERP implementation in a few years.

### Options make us stand apart, on-premise or ERP as a service

With the Avanade Cloud ERP solution you have options. You can choose to build on-premise or take advantage of our ERP as a service. If you prefer Avanade to manage your system, but you still want the option to bring your ERP system in-house, this option is available to you.
