

Version Upgrade for Dynamics AX 2012

Improve your ERP experience

Avanade's proven approach to upgrading to Microsoft® Dynamics™ AX 2012 allows you to take advantage of the latest enhancements while ensuring a smooth transition and lowering the cost of current and future upgrades.

Improve insight and agility while lowering costs

- Gain real-time visibility with Microsoft Dynamics AX 2012 enhancements in web-based access and reporting, KPI-driven dashboards and role centers.
- Create a more agile business with built-in industry enhancements and improved functionality in financials, procurement, supply chain management and project management.
- Achieve significant operational gains, with improved integration to Microsoft applications, including Office 2010, SharePoint® 2010, and Lync™ messaging.
- Convert as much as 50% of custom code to standard Microsoft code for a more stable Dynamics AX experience and more affordable future upgrades.
- Simplify your upgrade experience with a process that limits the effort required from your team.

Robust enhancement set

Dynamics AX 2012 is designed to lower costs while simplifying your IT experience.

- Enhanced financial and procurement functions support streamlined business processes and reporting, enable compliance, and improve employee productivity.
- Improved project management tools let you analyze performance and track expenses, even over the web.
- Advanced distribution enhancements within logistics, discounts, and sales order management allow quick response to changing market dynamics.
- Prebuilt industry capabilities decrease customization and time to value for organizations with industry specific requirements.
- Built-in, role-tailored workflow improves regulatory and best practice compliance as well as employee productivity.
- Flexible deployment options, including on-premises or in-the-cloud, enhance security while lowering your total cost of ownership.

A proven approach

Avanade provides a proven path for upgrading to Dynamics AX 2012 designed to lower your costs and smooth your transition.

We offer a complete approach to upgrading customers, covering the conversion of custom code, migration of data and training of your people.

For most customers, Avanade can eliminate as much as 50% of custom code, providing for a more stable IT experience and lowering the cost of future upgrades.

Our approach keeps you informed every step of the way, but limits the disruptions to your business and the effort needed by your staff. And upgrading to Dynamics AX 2012 is affordable, with most customers finding the cost of upgrading to be less than half of their original development costs.

Gain insight, innovation, expertise
