Enterprise Orchestration

Enterprise Orchestration is a set of services and solutions that enable health providers and payers to streamline collaboration and communication using a single secure, compliant cloud-based platform. The solution breaks down traditional barriers due to siloed and disconnected systems and processes and converts them into efficient collaboration and communication. It is known for its improvement on employee satisfaction and retention due to significantly reducing the amount of time spent on administrative tasks, which in turn enables employees to spend more time on things that matter.

The Enterprise Orchestration solution is an iterative and agile approach that improves service levels, outcomes and satisfaction for both patients and employees by using Microsoft cloud platforms across enterprises.

Optimize

Optimize clinical operations and administrative operations to reduce cost and better serve patients.

Enable

Enable better clinical outcomes through templated collaborative experiences across the entire care team.

Improve

Improve productivity, engagement and retention of talent by creating enhanced employee experiences that have a direct impact on the patient.

Facilitate

Facilitate standardization, scale and best practice service delivery models.

Eliminate

Eliminate the cost of one-off systems for messaging and advisory board facilitation by leveraging the Office 365 platform you've already paid for

About Avanade

Avanade is the leading provider of innovative digital and cloud services, business solutions and design-led experiences on the Microsoft ecosystem. With 38,000 professionals in 25 countries, we are the power behind the Accenture Microsoft Business Group, helping companies to engage customers, empower employees, optimize operations and transform products, leveraging the Microsoft platform. Majority owned by Accenture, Avanade was founded in 2000 by Accenture LLP and Microsoft Corporation.

Clinician Virtual Assistant

The Clinician Virtual Assistant uses advanced technology, data science, AI and Machine Learning (ML) to reduce the heavy administrative burden of clinical documentation and clerical tasks that lead to high physician turnover. The solution helps to address challenges such as frustration, stress and physician burnout; healthcare compliance; and increased manual, repetitive tasks that often result in less than ideal healthcare delivery.

The Clinician Virtual Assistant improves physician experience by allowing doctors to spend more quality time with their patients, resulting in better patient experience, and drives efficiency of clinical documentation and EHR regulatory compliance.

Improve

Improve retention rates and lower replacement costs by reducing the time physicians spend in front of the computer by 30-50%

Scale

Extend beyond individually-focused productivity tools to engage an entire workforce of physicians and clinical support staff.

Utilize

Utilize ML to enhance the virtual agent's ability to provide an accelerated path to compliant, rigorous and complete clinical documentation

Enhance

Enhance physician experience with virtual agent dialog powered by Speech AI, Text Analytics, ML and advanced knowledge of the clinical workflow

Realize

Realize rapid value with our Proof of Value to Pilot to Production approach

About Avanade

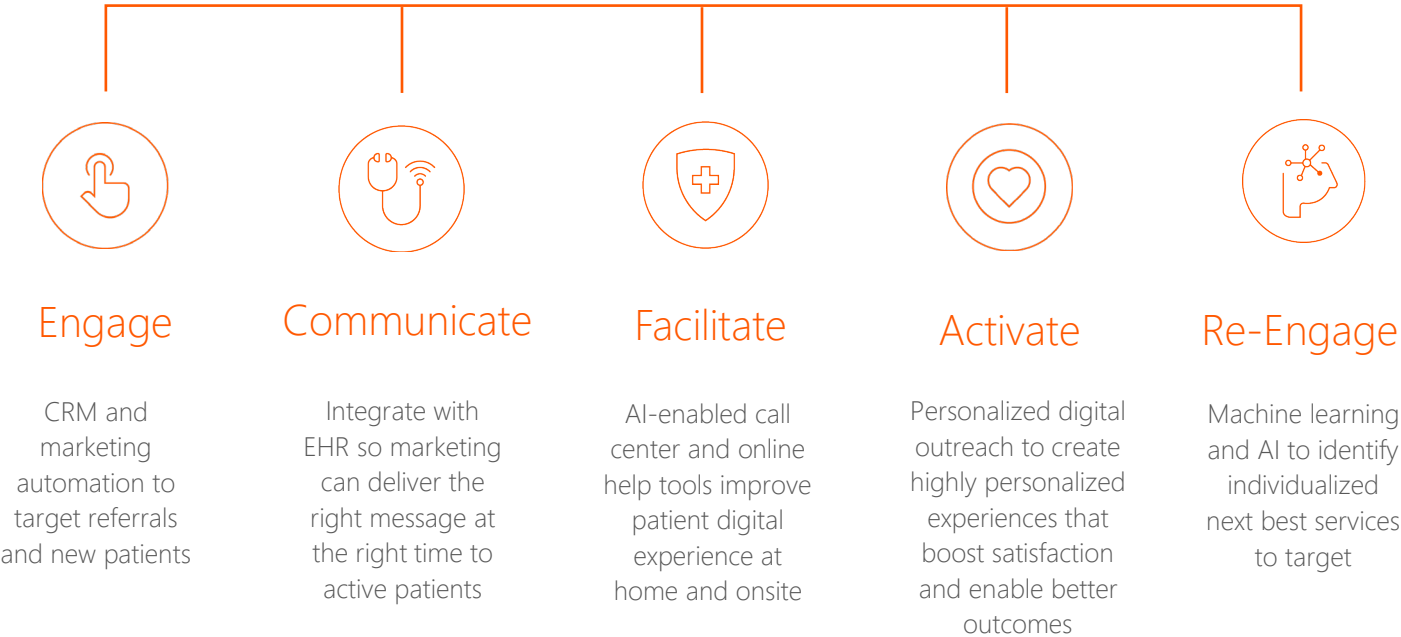

Avanade is the leading provider of innovative digital and cloud-enabling services, business solutions and design-led experiences, delivered through the power of people and the Microsoft ecosystem. Majority owned by Accenture, Avanade was founded in 2000 by Accenture LLP and Microsoft Corporation and has 38,000 professionals in 25 countries. Visit us at www.avanade.com.

Intelligent Marketing and Engagement for Providers

Our accelerator equips you to attract patients and improve engagement based on insight, not just instinct, and to meet the needs of each patient at every stage of their journey.

As Microsoft’s 2018 Alliance Partner of the Year – for the 11th straight year in a row – you can rest assured in our ability to bring the best resources to power your intelligent marketing.

Virtual Tumor Board

The Avanade Virtual Tumor Board is a solution based on Microsoft Teams that allows doctors and other caregivers to review case histories, x-rays and test results, and access reference materials.

Clinicians can collaborate with specialists around treatment options anywhere and anytime from their device of choice. Improved documentation for each patient can be referenced in treating new cases. Avanade has developed preconfigured templates along with an implementation process that can help healthcare provider organizations get up and running quickly.
