

# Avanade supports IT changes at Evonik with **people-first approach**

**Avanade Advisory** leads workshops, webinars and virtual consulting sessions to help the company maximize familiarity with and utilization of **Microsoft 365** tools. Meeting corporate digitization goals just got fun!

A world leader and expert in specialty chemicals,

**Evonik employs 33,000 people**

committed to improving life today and tomorrow with sustainable solutions.

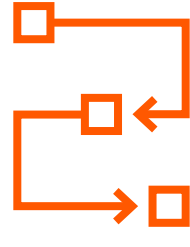

## Business situation

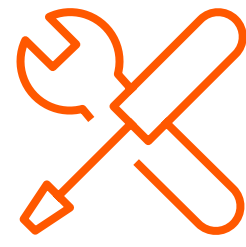

Evonik's rollout of Microsoft 365 coincided with a company restructuring.

IT lacked resources to train employees

Implementation and adoption were digitization milestones

Tools were introduced without guidance

## The challenge

Encourage virtual collaboration and process harmonization through Microsoft 365 with fun so employees use the apps for maximum organizational efficiency.

## The solution

Avanade led short sessions to introduce apps and allow trial and offered deep-dive workshops by request. We also moved in-person events to **Microsoft Teams**, adapting meeting length and format to optimize results.

### Learn

Understand how employees use Microsoft 365 by business unit and role.

### Measure

Determine KPIs for Evonik's digitization roadmap.

### Reinforce

Customize intensive training with relevant use cases, demos; document lessons for reference.

## The results

**95%**

called workshops completely understandable

**>90%**

liked the workshops

**72%**

rated app exercises "just right"

More sessions + virtual consulting services

Discover how **Avanade Advisory** can help you create and orchestrate practical digital strategies to achieve outcomes faster.
