

Spanish bank replaces paper workflows with mobile-enabled, flexible processes to advance its vision

Employees collaborating on loan approvals can review transactions, comment and document decisions in-person, in-real time, speeding up the approval process.

Daniela, a branch financial advisor, can have more productive conversations with customers.

Ricardo, an executive, can advance bank goal of green IT through digitized workflows, while enabling greater transparency and collaboration.

How does it work? Avanade is delivering...

- Windows 8 tablets for branch financial advisors to use for sales conversations
- Embedded tablets in bank meeting rooms to support greater collaboration, digitization of paper workflows
- Back end systems integration, enabling headquarter employees to do work on touch-screen Windows 8 tablets
