

# Fresenius deletes 86% of unused applications ahead of its move to the cloud

Faster, more accessible content and services treats employees to a better workplace experience

## The company

Fresenius is a global health care group offering high-quality products and services for dialysis, hospitals and outpatient treatment. With over 280,000 employees in more than 100 countries around the globe, and annual sales exceeding €30 billion, Fresenius is one of the world's leading health care companies.

## The challenge

**A costly, complex IT infrastructure with tens of thousands of unmanaged, offline applications was no longer supported.**

Fresenius wanted a user-friendly, collaborative platform that would enhance the employee experience and complement its broader migration to Microsoft 365.

## The solution

**From Lotus Notes to Microsoft SharePoint Online**

### Service and application consolidation

Processes and tools were set up to delete unnecessary applications and migrate employees to SharePoint and Exchange Online.

### Structured delivery approach

An organized implementation supported a highly regulated environment.

### Stakeholder engagement

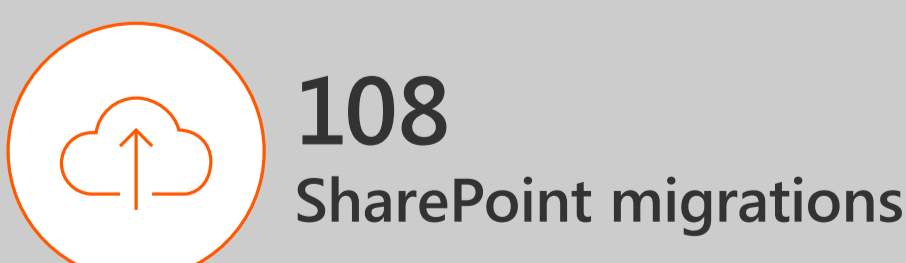

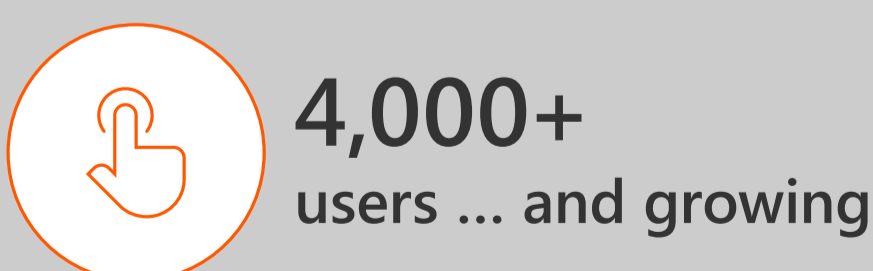

To help ensure applicability and adoption, we consulted **326 IT managers** in **161 Fresenius locations** in **66 countries**.

## The results

**Always connected, always accessible – with faster support**

- ✓ **Improved** employee engagement and collaboration
- ✓ **Decreased** IT complexity
- ✓ **Increased** efficiency
- ✓ **Greater** mobility with anytime, anywhere access to information
- ✓ **Reduced** licensing costs

## How will you modernize your workplace?
