

# Rethink Security

Build Identity Resilience across your organization

## Unlock the value of robust digital identity

In a growing and complex digital evolution, a cohesive digital identity strategy that can unlock value needs to be at the centre of your operations. The front door for your users, devices and applications, it's the central point of intelligence and defense, crucial to effectively managing cybersecurity.

## Trust in a digital world

Robust digital identity enables seamless interactions, in a trusted way, enabling new business models and better employee experiences. It can unlock immense value and transformational benefits including:

### Employee Experience

- Frictionless authentication and authorization
- Integrated user experiences and personalization
- Easy onboarding

### Cost Savings

- Shared services
- Enablement of the cloud, SaaS and new business models
- Reduction of compliance overhead

### Risk Reduction

- Visibility of who has access to what systems, data, and how they use that access
- Strong controls
- Transparency and traceability

## A comprehensive approach to ensure identity resilience and compromise recovery

Avanade leverages deep Microsoft expertise, trusted partnerships and experience to provide end-to-end identity security. Our comprehensive approach combines 4 pillars:

- 1. Enterprise Identity Governance & Administration** – A full lifecycle of IAM services, covering data management, processes and technologies to securely govern identities and entitlements for all employees.
- 2. Zero Trust Access Management** – Comprehensive single sign-on and access management for all identities from workforce, contractors, third-party, and partners. Advanced capabilities to manage access of sensitive privileged account credentials, password management, brokered access and session monitoring.
- 3. Cyber Incident Recovery and Remediation** – A framework designed to isolate and mitigate the current threat and restore integrity and confidence in critical business systems. Transformation of security operations to build resilience, so that you can withstand new and evolving threats.
- 4. Emerging Technologies** – Leveraging our expertise to bring you the boldest and most innovative solutions to help you solve your identity challenges, enabling you to stay ahead of threats.

## Who we've worked with

**SIEMENS** A secure, state-of-the-art workplace elevates employee experience

**RWE** Implementation of innovative technologies from Microsoft, laying the foundation for RWE to evolve its business and improving the [workplace experience](#) for its employees

**Crelan** Securely unlocks the value of the cloud to kick-start its digital transformation

**europ assistance** Europ assistance Belgium innovates for the future by embracing cloud technology

## Take the next step

Avanade offer an **Identity Infrastructure and Process Assessment** to help you on your journey to build a modern digital identity strategy. This includes:

- Evaluating your infrastructure to identify areas of improvement, modernize your identity and authentication strategy.
- A focus on building capabilities and governance across Identity and Access management, Identity governance and Privileged Access Management.
- A plan to help you realize a secure identity perimeter, while enhancing the user experience and enabling collaboration without boundaries.

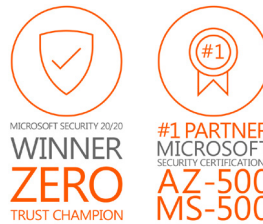

## Why Avanade?

Recognized as the **Microsoft 20/20 Security award winner** for [Zero Trust Champion](#), we provide proven methodologies and deep expertise with leading-edge technology.

We have been recognized as having **Advanced Specialization** status from Microsoft across the following Security domains, giving you peace of mind that you will receive the highest standards of service delivery and support.

- **Identity and Access Management** – deep knowledge and extensive experience of deployment of Microsoft Identity workloads with Azure Active Directory (Azure AD).
- **Information Protection and Governance** – capability to deploy Microsoft Information Protection workloads and provide proactive strategies that enhance data security.
- **Threat Protection** – helping you to protect against threats with advanced capabilities to deploy Microsoft Threat Protection, Microsoft Cloud App Security, or Azure Sentinel workloads.

As a managed security provider, we can also augment your security team and provide 24/7 monitoring of events and operational support to help you stay ahead of security risks. Visit [www.avanade.com/DI](http://www.avanade.com/DI) for more information
