

Build resilience with Zero Trust security

Be ready for continual change

During the pandemic, many organizations had to scramble to adapt, often at the expense of security. Now more than ever the future is unknown.

Technology will continue to evolve faster than we can keep track and with organizations facing new and constantly evolving security threats, it's essential to build resilience so that you're prepared for whatever's next.

Security concerns don't need to hold you back

As you look to drive digital transformation and innovation, security concerns don't need to be an obstacle. If like many organizations, you're busy playing defense on cybersecurity you may not have had time to consider the big-picture issues. This raises a number of critical questions:

- Do you need a way forward to help offset technical debt?
- Is there more you can do to secure and enhance the employee experience for remote work?
- If you have relaxed policies during the pandemic, have you re-evaluated things from a compliance and risk perspective?
- Is your security strategy based on Zero Trust principles?

Unlock the value of Zero Trust security

Avanade are the experts at securing your Microsoft and hybrid IT ecosystem and through the implementation of Zscaler technologies, we can help you to unlock immense value and transformational benefits.

Risk reduction

- A more robust security posture with better visibility and granular policy enforcement
- Delivery of internet and web security for users and corporate compliance
- Full integration with your security ecosystem
- Zero attack surface
- Prevent unauthorized lateral movement

Productivity Improvements

- Secure hybrid working enablement with policy-based access to any application from any network
- An improved, faster and secure user experience
- Reliable, fast and secure access across the internet
- Accelerate application shift to public or private clouds

Cost reduction

- Optimization of your Microsoft (M365) and other licensing investments
- Reduction of security complexity and TCO with an 'as a service' model
- Reduction of network costs by minimizing hub, spoke networks and MPLS backhauling

Avanade and Zscaler: Better together

Recognized as [Zero Trust Champions](#) (SI and ISV) at the Microsoft Security 20/20 awards, Avanade and Zscaler are the best-of-breed partners to help you build resilience through Zero Trust security.

Avanade are the experts at helping you secure your Microsoft and hybrid IT ecosystems and with the implementation of Zscaler technologies, we can help you to setup reliable and secure remote access, all based on Zero Trust principles.

Who we've worked with

SIEMENS

Siemens – delivering a secure, state-of-the-art workplace elevates the Siemens employee experience

Challenge

Siemens launched a complex workplace transformation to bring the company into a new digital era and give employees a better experience.

Solution

The full suite of Microsoft 365 was deployed and approximately 380,000 users were migrated in over 2,800 locations across 108 countries.

Results

Siemens now has a secure, modern workplace that elevates the employee experience. This modern workplace helps to drive business growth through digitalisation, including faster time to market, analytics, end-to-end services and efficient IT delivery.

LifeWorks

LifeWorks – boosts its security posture to enable new ways of working

Challenge

LifeWorks wanted to create a great workplace experience for its more than 7,000 global employees with a modern technology ecosystem and optimised operations.

Solution

The increased cybersecurity risks associated with remote working led LifeWorks to accelerate its move to the full services of Microsoft 365's secure E5 suite.

Results

After a phased implementation of Microsoft 365 E5, LifeWorks is able to manage the fast-evolving threat landscape and has boosted the workplace experience for employees.
