Build cyber resilience with zero trust security

with Avanade and Zscaler

Protect your business as it transforms.

To drive digital transformation and innovation, you need to evolve your security operations in parallel. In partnership with Zscaler, Avanade can help you to build cyber resilience with zero trust security.

Our services help you to:

- Enable secure hybrid working with reliable, secure and fast remote access
- Accelerate application shift to public and private clouds
- Optimize your Microsoft (M365) and other licencing investments

Security concerns don't need to hold you back

Avanade are the experts at securing your Microsoft and hybrid IT ecosystem and through the implementation of Zscaler technologies, we can help you to unlock value and transformational benefits.

The ZScaler Cloud Security Platform converges security solutions, simplifying IT and operations. It transforms enterprise networks and security by securely connecting users to their applications and cloud services, regardless of device, location or network, providing the following benefits:

- **Improved user experience:** Remote offices and mobile users get secure direct-to-cloud connectivity, providing a better user experience.

- **Enhanced user security:** Cloud delivery allows security to follow and protect the user, no matter where they connect, providing better protection than traditional centralized gateways.

- **Cost reduction:** Reduction of network costs by minimizing hub, spoke networks and MPLS backhauling as well as optimization of your Microsoft (M365) and other licensing investments.

Better Together:
Avanade and Zscaler

Recognized as Zero Trust Champions (SI and ISV) at the Microsoft Security Excellence Awards*, Avanade and Zscaler are the best-of-breed partners to help you build resilience through zero trust security.
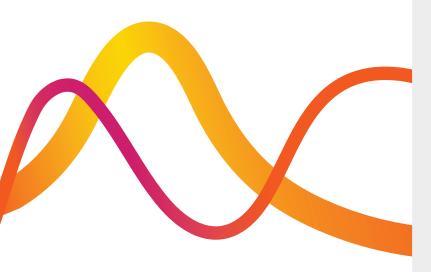

Together, we can make secure your remote access program and Microsoft O365 user experience empowering users to be productive anywhere on any device, all based on zero trust principles.

Do what matters

Who we've worked with

A **health and wellness services company** eliminated redundant network security devices for a streamlined VPN and stronger security that matches the demands of hybrid work. As part of the implementation there was a meticulous knowledge transfer from Avanade and Zscaler to their internal teams, including detailed design and build guides, ensures that they won't be vulnerable to dangerous service gaps.

A **consumer products company**, preparing to divest from its parent, needed to stand up a brand new IT and operations environment with an ironclad yet cost-effective security design. Avanade and Accenture, in conjunction with Zscaler maximized their existing Microsoft 365 E5 investment to bolster their cloud first strategy with efficiency, scalability and continuity of the user experience.

A **leading law firm** modernized its connectivity across their many offices, giving their employees the impeccable experience, that today's hybrid work environments require. Behind the scenes, Avanade conducted an assessment of different user persona needs and incorporated them into a new cloud-based architecture through which all on-prem apps and SaaS are routed, leveraging Zscaler technology.

A **financial services company** faced extreme strain of and vulnerability to its security network with thousands of employees needing access to their SaaS apps. What was once a slow and frustrating interface is now flexible, scalable and operating at true on-demand speed with a move from on-prem to Zscaler cloud. Avanade's solution removed clunky firewalls and reduced the firm's spend on backhauling network traffic through a datacenter.

Start your journey today

If you're looking to enable a cloud-first enterprise through a global transformation of applications, network and security, a great place to start is one of our Discovery Workshops.

In each workshop, we will work with you to understand your business drivers, existing infrastructure, and processes to come up with a holistic assessment of your security landscape and risks. From here we create a roadmap to help you realize your security vision.

Register your interest for a Discovery Workshop [here].

About Avanade

Avanade is the leading provider of innovative digital, cloud and advisory services, industry solutions and design-led experiences across the Microsoft ecosystem. Every day, our 60,000 professionals in 26 countries make a genuine human impact for our clients, their employees and their customers. Avanade was founded in 2000 by Accenture LLP and Microsoft Corporation. Learn more at www.avanade.com.

About Zscaler

Zscaler (NASDAQ: ZS) accelerates digital transformation so customers can be more agile, efficient, resilient, and secure. The Zscaler Zero Trust Exchange protect thousands of customers from cyberattacks and data loss by securely connecting users, devices, and applications in any location. Distributed across more than 150 data centres globally, the SASE-based Zero Trust Exchange is the world's largest in-line cloud security platform. Learn more at www.zscaler.com.
