Virtual Tumor Board

The Avanade Virtual Tumor Board is a solution based on Microsoft Teams that allows doctors and other caregivers to review case histories, x-rays and test results, and access reference materials.

Clinicians can collaborate with specialists around treatment options anywhere and anytime from their device of choice. Improved documentation for each patient can be referenced in treating new cases. Avanade has developed preconfigured templates along with an implementation process that can help healthcare provider organizations get up and running quickly.

Empower
- Empower clinicians by equipping them with information for clinical decision making

Collaborate
- Bring together all the care team members in one environment with real-time messaging through mobile text or video

Streamline
- Streamline processes by using automation to create efficient and effective workflows

Coordinate
- Seamlessly coordinate with colleagues so the best care decisions can be made for each patient

Engage
- Engage the clinical and administrative staff by providing tools that allow them to be more efficient with their time
