

Renew and grow the value of your **healthcare cloud journey**

It can accelerate and scale secure data-driven solutions that power interoperability. And that provides greater value to help you rapidly deploy functionality and modernize services.

What can **the cloud** do for you?

70% of healthcare executives

most frequently cite the ability to launch applications faster as top benefit of the cloud; additional top benefits include better security and greater agility.

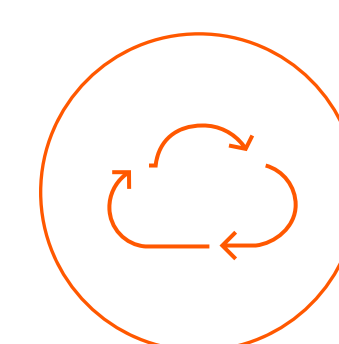

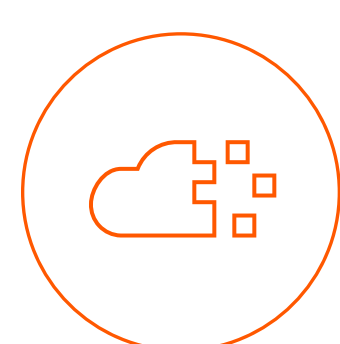

More efficient cloud operating models are powered by analytics, automation and AI, with a savings of approximately

30% to 50% in ongoing operations.

30% of the world's data volume

is generated by the healthcare industry, and the storage and transmission needs are immense, requiring secure, stable solutions operating at scale.

A clear path to **better outcomes** no matter where you are in your journey

“Lift and shift” is just the beginning for most. Healthcare leaders are looking to unify systems, platforms, ISVs, on one integrated platform for a more coordinated and connected healthcare experience.

Modernize existing applications determining which are perfect candidates for the cloud such as those that are public facing or reach across care settings. This might also involve modernizing an app to help solve a specific challenge or create new capabilities.

Create and innovate to enable care team collaboration, enhance patient and provider experiences, and improve data-driven insights for better outcomes.

Industry-specific clouds comprise components plus add-ons that deliver personalized capabilities, such as note transcription for physicians and patient translation services.

Microsoft Cloud for Healthcare brings together capabilities from Microsoft Azure, Dynamics 365, Microsoft Power Platform and Microsoft 365.

Rethink Microsoft Cloud for Healthcare, personalized by Avanade

Uniquely qualified with Microsoft expertise, certification and track record, at Avanade, we have privileged access to Microsoft working with them on cloud interoperability and roadmaps for greater organizational resilience and agility. www.avanade.com
