What it looks like

An energetic and productive day-long workshop designed to help your team build value for your organization leveraging the power of data and visualizations.

We'll work along-side you and your teams to create a prototype set of usable reports and dashboards to take back to your organization. You will be ready to share these reports with your organization for sharing and interpretation by others.

Lab 1 Design	Lab 2 Orientation	Lab 3 Development	Lab 4 Publish
BEGIN IT <ul style="list-style-type: none"> • Scenario Context • Organization Insights • End-User Assumptions 	BRING IT <ul style="list-style-type: none"> • Expectations for the Day • Introduction to Power BI • Review of Data Set 	BUILD IT <ul style="list-style-type: none"> • Build first data model in Power BI • Create visualizations aligned to your vision in earlier lab • Create measures and KPI's 	BANK IT <ul style="list-style-type: none"> • Publish • Create one or more dashboards • Share and facilitate collaboration
IN PRACTICE <ul style="list-style-type: none"> • Stating the Business Problem) • Use Case, User Map • Identify key assumptions, questions, and constraints 	IN PRACTICE <ul style="list-style-type: none"> • Review Features and functions of Power BI • Data Curation and Transformation • Overview of Data Modelling 	IN PRACTICE <ul style="list-style-type: none"> • Create the Data Model • Create measures and KPI's • Create visualizations 	IN PRACTICE <ul style="list-style-type: none"> • Methods for sharing: Mobile, Web included • Next Steps • Wrap-Up

Successful Change

If you're about to invest or have already invested in your customer experience technology and realize that people, not technology alone, are necessary to create a great customer experience. We help you identify and understand the human elements critical to great customer experiences and build a change approach to bring them to life for your organization.

What it looks like

This two to four week engagement helps you create a hypothesis about your marketing data. It starts with a two day intensive workshop that walks through 1-5 hypothesis builds and brainstorming, followed by the identification and access of the data to prove or disprove your hypothesis. This offer is intended to lead into a proof of concept of pilot for advanced marketing analysis. We help clients image, test and refine with real data to help solve business problems and build a new future.
