Plan your foundation for ongoing value

Avanade Collaboration Strategy is a packaged service offering that helps you clearly visualize and articulate how to align your investments in collaboration technologies with your organization’s needs.

Sustain business growth through collaboration

- Reduce time to value and increase competitive advantage through optimized use of your collaboration tools.
- Enhance productivity and increase organizational efficiency.
- Improve workflow, reduce labor cost and increase resource capacity through the sharing of information.
- Create actionable roadmaps to help you realize a better return on your collaboration program investments.
Gain full value from our deep insights
An Avanade Collaboration Strategy engagement begins with an assessment of your organization’s needs. Our experts then prioritize them to create a strategic project plan that leverages our strategy solution implementation experience and the Microsoft platform. This tailored collaboration foundation provides a statement of work and budget for each step that empowers you to realize the value of a well-orchestrated collaborative working environment.

Understand and maximize investments
Avanade experts apply global experience and proven methodologies that help you identify critical gaps in your organization’s collaborative capabilities. Armed with this overview, you can effectively streamline disparate platforms and decrease or eliminate fees paid to maintain legacy data sources. We deliver an accurate and strategic appraisal of your company’s collaborative capabilities that equips you to increase your competitive edge.

Avanade helps large pharmaceutical company
A global pharmaceutical company discovered that disparate record-keeping systems were preventing the assimilation of newly acquired business units. With Avanade Collaboration Strategy, our customer defined and developed a strategic technology roadmap that helped the company define application development standards, identify and execute training for developers, administrators and users, increase collaboration throughout the enterprise and consolidate its organizational structures.

Increase operational efficiency with strategic planning
Avanade Collaboration Strategy provides you with clearly defined roadmaps and timetables to help you achieve tangible business results from your collaboration investments.

1. Assessment
Begin with an evaluation of your company’s capabilities and in-depth discussion with your executives and internal experts.

2. Prioritization
Following the analysis of your company’s existing infrastructure, we determine your goals and create a prioritized program list that we match with the needed or existing Microsoft or Avanade assets.

3. Roadmap
By the end of the 6-to-8 week engagement, you will have an actionable roadmap that drives vision and aligns your collaboration programs.
