

# Avanade® Enterprise Resource Planning Solution

Avanade ERP for Financials and Procurement

## Enhance financial and procurement capabilities

### Build a strong financial and procurement foundation

The Avanade ERP for Financials and Procurement solution helps organizations with complex financial and procurement requirements simplify processes and build a more agile and streamlined business.

### Get compliant, streamlined, agile and productive

- Support complex financial and procurement processes and enable compliance with statutory regulations and business practices.
- Streamline business processes with powerful workflow and support complex reporting needs across the organization.
- Develop the agility needed to adapt easily to change and drive business growth.
- Enhance employee productivity with self-service applications and intuitive, familiar tools.

## Avanade® Enterprise Resource Planning Solution

Avanade ERP for Financials and Procurement

### Enable compliance and streamline processes

Built on the powerful Microsoft Dynamics AX platform, the Avanade ERP for Financials and Procurement solution helps enhance productivity. This robust solution also streamlines complex processes, improves reporting and helps ensure compliance.

With role-based, easy-to-use tools, business intelligence becomes a natural extension of everyday processes. Our solution also provides enhanced flexibility with intuitive SQL Server Cubes and reports. This gives business leaders the information they need for effective decision-making.

Included in our solution are the Microsoft Dynamics AX workflows and Role Centers. These help ensure defined processes are followed consistently across the organization.

Pre-defined reports make sure you stay in compliance with the legal requirements of your business and help provide an overview of your financials.

Avanade ERP for Financials and Procurement reduces the time it takes to consolidate information from subsidiaries with the corporate entity. Our solution fulfills statutory requirements in 40+ countries and supports associated local languages, time-zones and currencies.

### Drive productivity and agility across your organization

The Avanade ERP for Financials and Procurement solution extends Microsoft Dynamics AX with over 20 additional financial features. The enhancements include automatic bank reconciliation, electronic payment management, automated vendor payment and settlement of transactions. Reporting, printing and queries can even be run across multiple companies. These Avanade-exclusive enhancements save time and reduce the potential for errors.

Dispersed teams and disconnected systems create a drain on employee productivity. Avanade ERP for Financials and Procurement encourages collaboration and provides an agile platform for business growth.

Users of Microsoft Office Outlook will feel right at home in our solution as the look and feel of the solution is quite similar. With built-in support for other popular tools such as Microsoft Lync and SharePoint, our solution allows your users to become more productive.

For growing businesses, our solution helps speed the onboarding of new operations. You can choose to deploy on-premises or in the cloud, without sacrificing functionality. Avanade's Fast Implementation Track (FIT) methodology accelerates the roll out timeframe.

### Insight

Avanade provides a powerful combination of business, industry and technology insights that results in an affordable ERP package tailored to the specific needs of your business.

### Innovation

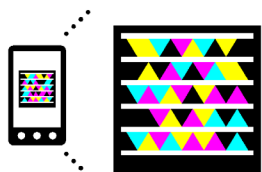

The Avanade ERP for Financials and Procurement solution reflects the collective experience of our global network of consultants and industry experts, real-world feedback from customers and collaboration with our partners—Accenture and Microsoft, to create an industry leading solution. Pre-defined business processes, Cloud ERP and Two-Tier deployment let you optimize your IT environment to the needs of your business and with a view to the future.

### Expertise

A global network of over 15,000 professionals serving customers in over 20 countries provides a unique collection of resources to successfully deliver even the largest, most complex projects on-time and within budget.

*"Avanade's feedback and contribution were valuable to us in the development of Microsoft Dynamics AX 2012. We are pleased to partner with them to deliver the new product globally to customers on-premises or in the cloud, enabling them to manage, anticipate and embrace changes in their business environment."*
