

Virtual Tumor Board

The Avanade Virtual Tumor Board is a solution based on Microsoft Teams that allows doctors and other caregivers to review case histories, x-rays and test results, and access reference materials.

Clinicians can collaborate with specialists around treatment options anywhere and anytime from their device of choice. Improved documentation for each patient can be referenced in treating new cases. Avanade has developed preconfigured templates along with an implementation process that can help healthcare provider organizations get up and running quickly.

About Avanade
